

REQUEST FOR QUOTATION (RFQ)

Development of ESG Dashboard and Repository System

1. Background

Universiti Teknologi PETRONAS (UTP) is undertaking a Net-Zero Campus Transformation initiative and invites qualified vendors to submit quotations for the development of an ESG Dashboard and Repository System (Phase 1). The system will serve as a centralized digital platform to consolidate sustainability data, support ESG reporting, and enable visualization and analytics aligned with UTP's sustainability and Net-Zero Carbon Campus (NZCC) objectives.

2. Objectives of the RFQ

The objective of this RFQ is to appoint a vendor to design, develop, implement, and deploy of the ESG Dashboard and Repository System based on UTP-provided functional design and architectural guidance. This phase focuses on establishing a digital foundation for sustainability visibility, focusing on covering Scope 1 and Scope 2 emissions.

3. Scope of Work

The appointed vendor will be responsible for system development and implementation, including but not limited to the following:

- Development of a cloud-based ESG data repository supporting structured and unstructured data
- Implementation of data ingestion mechanisms via APIs and web-based forms
- Development of an ESG dashboard with visual analytics for energy consumption, emissions, and sustainability indicators
- User management with role-based access control
- AI/LLM-enabled analytics and reporting capabilities (where applicable)
- Automated report generation in PPT, CSV, and Excel formats
- System integration and deployment in UTP-approved infrastructure
- Testing, user acceptance support, and initial warranty period

4. System Design Responsibility

The overall system concept, functional requirements, high-level architecture, and dashboard design will be provided by UTP. The vendor is expected to carry out detailed development, configuration, and technical realization in accordance with the provided design, while proposing suitable technical approaches and value-added features that align with the project objectives.

5. Deliverables

- Operational ESG Dashboard and Repository System
- Configured databases (Relational and NoSQL, where applicable)
- Data ingestion interfaces (API and webforms)
- ESG dashboards and analytics views
- Automated reporting modules for Scope 1 & Scope 2 emissions
- System documentation (user and administrator guides)
- Deployment and go-live support

6. Project Timeline

The indicative duration for Phase 1 is approximately 4 to 6 months from the date of award. Vendors should include a proposed development and delivery timeline as part of their quotation.

7. Budget

The indicative budget for this RFQ is in the range of RM180,000 to RM220,000 for Phase 1. Vendors are required to provide a clear cost breakdown covering development, implementation, and any optional items or assumptions.

8. Vendor Submission Requirements

- Company profile and relevant experience
- Description of proposed technical approach and architecture
- Compliance with the provided scope and design
- Project timeline and milestones
- Detailed cost breakdown
- Quotation validity period

9. Evaluation Criteria

Quotations will be evaluated based on technical suitability, alignment with UTP requirements, value for money, vendor capability, and proposed implementation approach.
